

CAREER OBJECTIVE

Highly educated, bilingual professional, with more than **8 years** spent pioneering new technologies. Successful and punctual with exceptional debugging skills. Seeking an opportunity as Senior Software Engineer / Team Lead and create dynamic apps for the Android and/or iOS marketplace.

PROFILE

As a Consultant at TechVista, I collaborate with a team of engineers and designers to create innovative and user-friendly fintech mobile android applications using Java and Kotlin and iOS using swift. Using Swift UI and Jetpack compose for UI, I also implement best practices for mobile architecture using MVI, MVVM, MVP and MVC architectures, testing using Junit, Mockito and CI/CD practices using Jenkins, GitHub Actions and MS App Center.

With a BS(IT) degree in Information Technology from University of the Punjab, I have a strong foundation in software development and data structures. I have also acquired multiple certifications in iOS, KMP, Flutter, and Kotlin Coroutines, which reflect my passion for learning new technologies and enhancing my interpersonal skills. My goal is to leverage my expertise and experience to deliver high-quality and impactful mobile solutions for TechVista clients.

WORK EXPERIENCE

TechVista (Mar 2024 – Current)

Designation: Consultant (Mobile Applications)

Responsibilities:

- Collaborated with cross-functional teams to define, design, and ship new features, meeting project deadlines and requirements.
- Applied encryption techniques for data security, safeguarding user information against potential threats.
- Analyzed and resolved software bugs, improving application stability and user satisfaction across multiple Android & iOS versions.
- Collaborated with cross-functional teams to gather requirements, design solutions, and deliver high-quality products on time

Bynolt (Jan 2023 – Mar 2024)

Designation: Lead Kotlin Developer (Android)

Responsibilities:

- Contributing to the development of Android Automotive Applications
- Crafted comprehensive documentation for software projects, aiding in maintenance and future development efforts.
- Managed version control using Git, contributing to streamlined development processes and team collaboration.
- Conducted thorough debugging and troubleshooting of software applications to identify and resolve issues, improving system reliability.

Programming Languages:

Java

Kotlin

Swift

Dart

Frameworks:

Android

NETSOL Technologies (Oct 2020 – May 2023)

Designation: Senior Software Engineer (Android)

Responsibilities:

- Implemented security protocols and encryption techniques, safeguarding sensitive data and complying with industry regulations.
- Conducted technical workshops and presentations to share knowledge and insights on emerging technologies and industry trends.
- Fostered a culture of continuous improvement, encouraging innovation and the adoption of cutting-edge technologies within the development team.
- Oversaw the selection and implementation of development tools and software frameworks, improving team efficiency and product quality.

Rebel Technology (Dec 2019 – Oct 2020)

Designation: Senior Android Developer

Responsibilities:

- Tailored applications to meet specific client needs, resulting in highly customized and successful products.
- Worked closely with the UI and UX team to create wireframes, storyboards, and user flows to guide product development.
- Utilized Firebase for real-time database management, authentication, and analytics, enriching app functionality.
- Produced prototype to demonstrate core functionality at various development stages.

TechCreatix - CubyCode (2019)

Designation: Mobile Applications Developer

Responsibilities:

- Worked on More than a dozen applications on Android, Flutter and iOS platform
- Writing Code from Scratch and bug fixes on previous projects
- Collaborated Product Owner to define, design, and ship new features and Apps for improved app performance.
- Worked backend systems using Node JS, Express JS and MongoDB

Sprint Solutions (Sept 2017 -Sept 2019)

Designation: Android Developer

Responsibilities:

- Researched emerging technologies and trends in the Android ecosystem, proposing innovative solutions to enhance app features.
- Designed and implemented adaptive UIs for different Android devices, ensuring a seamless experience across platforms.
- Integrated third-party libraries and APIs, streamlining app functionality and offering advanced features to users.
- Developed and maintained Android applications, enhancing user experience and interface design for optimal performance
